

## MODEL 2001

# MODEL 2001 HERMETI-CHECK

Hermeti-Check tests all single phase compressors up to 5 H.P., 110, 220 or 277 volts.

### FEATURES

- Tied-up compressors may be freed by reversing motor rotations.
- Tests windings for opens, continuity, and grounds.
- Tests start and run capacitors and system relays by substitution.
- Measures running amps, 0-10, 50A range.
- Measures start and run volts, 0-150, 600V AC ranges.
- Compressors are tested in the manner in which they were designed to operate: Split-phase, capacitor start, or PSC.
- Has provisions for connecting external run capacitor.  
(1) 30A breaker protected to allow high starting current with adequate overload protection.
- Complete with 220V adapter cord and capacitor leads.
