## ENGINEERING COMPANY

In partnership with Digi-Cool Industries, Thermal Engineering is pleased to introduce the DRSA 1600, an advanced, robust, and reliable A/C refrigeration manifold gauge built for professional HVAC/R technicians!

### Utilization of the DRSA 1600 has proven to provide the following:

- Provides rapid payback on investment
- Improves productivity— (Average one week of pure profit per technician per year!)
- Minimizes training time
- Reduces downtime
- Increases staff's trouble shooting capability
- Reduces costs on current maintenance contracts
- Simplifies cumbersome procedures
- Eliminates need for unnecessary or inappropriate repairs

### Features of the new DRSA-1600

- Compact Sleek design for easier handling
- Made for maximum robustness and durability
- Temperature probe for automatic superheat and subcooling readings
- 30 refrigerants are included on-board
- Updated pressure port design
- Can attach to popular manifolds using swivel fittings
- Dynamic offset bar graph clearly shows modulation of control valves, system behavior, and faults
